EXPERIENCE

Full Stack Developer
VietProtocol — Vietnam   2009 — 2011

Team size: 10 people

I used to work at **VietProtocol** as a developer. I joined in developing a website based on Joomla!

I got a lot of worthwhile experiences such as how to use CSS for HTML, developing Joomla! Template from PSD, and building a complete website on Joomla! as well as customizing template and extension as required.

Knowledge

• Joomla!
• PHP & MySQL
• HTML / CSS
• Javascript / jQuery
• Photoshop
• SEO

Full Stack Developer
Directive — USA   2010 — 2012

Team size: > 20 people

I worked at Directive Company as a supporter & full stack developer. I helped customers by inspecting the arising errors on their websites and comparing with companys extension. The errors may be caused by code extensions, the conflict with third partys extension, or configure user error. I was also a developer to resolve these issues or develop new features.

Backend Developer, Team Lead
JomSocial — USA   2011 — 2015

Team size: > 20 people.

I was in charge of backend developer as a core member. I took part in developing the JomSocial component directly.

I worked with **Mercurial** in managing codes, analyzed requests about features, discussed and gave the real plans for the project. Besides that, I supported customers with specific products (JomSocial) through forum and support system.

Knowledge improved with

• English communication
• Business analyze
• Team management
• Planing
• RnD for team

Technical Support
JoomlArt — Vietnam   2011 — 2015

Team size: > 20 people

I received this job at the same time with **Directive**. I was a supporter - I helped customers through the Ticket system and forum for the company's products.

I love to search practically, find bugs exactly in products, and fix them directly without committing because of not dealing with job developer. In addition, I solved errors from the conflict of third party. I also give suggestions to customers requirements, including analyzing on the real site.

Improved knowledged with

• Troubleshoot and debugging

Backend Developer, Team Lead
redWEB — Denmark   2015 — 2018

Team size: >15 people

I worked here on redSHOP - eCommercial. While I worked, I have fully focus on it as core Leader. I had analyzed all about the system, scale, solutions and business to made it easy planning for the next version of it.

Knowledge improved with

• Design pattern
• Team management
• PHPUnit
• WebDrive / CodeCeption

Technical Lead
Serdao & Capgemini — France   2018 — 2020

In **Capgemini**, Im working here to develop internal tools for HR based on Drupal, I also have been developing custom tool on Symfony which is faster and much more improve compared to the primary Drupal project.

In **Serdao** i'm working here eLearning project

Knowledge improved with

• Drupal
• Window Server
• Symphony
• eLearning system
• Build up infrastructure

Backend Developer / Team Lead
Aspire & Egitech — Singapore

I have surprisingly and fully 100% focus, I already expanded my improvement with lots of knowledge about Laravel & securing in Banking related areas.

Its hard to explain about this on paper only. In short I would say it was the most improvement of all-time-works. I was able to achieve a wide knowledge and a huge experience about:

• Unit Test/Data Mocking.
• Code pattern and optimizing for high usage flow
• CI/CD
• Data synchronize
• and much more

EDUCATION

Computer science   — Present

PROJECTS

My favorite pet project : XCrawler

It's used for multi purpose

• Self learning
• Crawling data (heavy database) & analayze
• Manage throttle
• Automation

FlyTicket

A complex platform for purchasing Fly ticket online with 3rd integrations.

It was used with

• React
• Symfony
